In the event of technical difficulties resulting in a dropped connection to the game server, the game you were playing is saved automatically and will load the next time you establish a connection to the game server. You will not be able to reconnect to the game server for the first 30 seconds after the disconnection.

Note: In case of malfunction all pays and play are voided; any bet that was not yet accepted will be voided, any bet that was unsettled will be refunded.

The prizes are paid in accordance with the payout table available on the game interface.

Any game in progress for more than 30 days will be cancelled, and the corresponding bet will be refunded.

2. HOW TO PLAY

Note: If you do not have enough money to play a game, the bet can be set to the minimum selectable amount through a dialog window informing about this.

All winning lines pay from left to right, beginning with the far-left reel. All line win symbols must appear on consecutive reels. Wins on different lines are all added. Only the highest winning combination on each line is paid. Winnings from Free Spins are added to the total win.

The auto spin feature does not automatically start free spins - player input is required (Available only for specific jurisdictions).

On the info bar, you can view the current BET, your BALANCE and your current WIN, displayed in either coin or your real currency, depending on the current user's choice (Available only for specific jurisdictions).
