CLUSTER COLLECTOR

- Cluster Collector symbols may randomly appear in the base game and stick to the reels until the end of the Hold the Jackpot™ Bonus Game.
- All Sticky Cluster Collector symbols are locked in place while other symbols are spun.
- The Cluster Collector symbol accumulates all values from adjacent Cash and Cash Infinity™ symbols and repeats this action for up to 5 spins. However, the prize will be paid at the end of the Bonus Game.
- If the Cluster Collector symbol is drawn on the middle row of the reels, it increases the chances of activating the Hold the Jackpot™ Bonus Game.

HOLD THE JACKPOT™ BONUS GAME

- All Bonus symbols stick to the reels during the Bonus Game.
- 3 Respins are granted at the beginning of the Bonus Game.

- Collecting all 25 Bonus symbols of any type awards the GRAND Jackpot of 2000x player's bet.
- The GRAND Jackpot is the maximum prize in the game and Bonus symbol values are not added to it.
- Hold the Jackpot™ Bonus Game is played at the same bet level and Volatility Level™ as the spin that activated the bonus.

CHANCE LEVEL™

- The game is played with the base bet set by default.
  However, the Chance Level™ feature can be enabled during the base game and you can select one of 3 levels:
  - Chance Level™ x2 - the base bet is multiplied by 2, giving you a 2x higher chance of activating the Hold the Jackpot™ Bonus Game.
  - Chance Level™ x4 - the base bet is multiplied by 4, giving you a 4x higher chance of activating the Hold the Jackpot™ Bonus Game.
  - Chance Level™ x6 - the base bet is multiplied by 6, giving you a 6x higher chance of activating the Hold the Jackpot™ Bonus Game.

- The Chance Level™ feature does not affect the paytable, thus symbol values remain the same as for the base bet in both the base game and the Bonus Game.
- Sticky symbols are temporarily removed from the reels when changing Chance Level™ and only appear on the Chance Level™ they were obtained on.

Extreme and Double Extreme Volatility
Using the Buy Feature, Hold the Jackpot™ Bonus Game can be activated on Extreme and Double Extreme Volatility levels, characterized by even bigger wins than other Volatility Levels™.

Malfunction voids all pays and plays.
Return to player averages between 96.05% and 96.23% depending on selected Volatility Level.

VOLATILITY LEVELS™

Choose your favourite game style

Low volatility: The payouts you receive in this mode are more frequent but in most cases smaller. This level is perfect for players who prefer shorter game sessions.

Standard volatility: This mode is a mixture between Low and High and is dedicated to players who are looking to feel the thrill of big wins in a fair frequency.

High volatility: In this mode you can hit BIG WINs but they are not as frequent as winning in Low mode. High is an excellent mode for players who are not afraid of taking a risk to win big.

Any game in progress will be completed after 24 hours and the corresponding prize, if any, will be deposited into the account. In the case of a bonus round, only the total winnings from games completed by the player at that time will be deposited into the account.

Winnings are paid according to the payout table. Notwithstanding the foregoing, should an upper winning limit be specified, said limit will prevail. However, the upper limit may be unreachable depending on the game's bet configurations.

Some features, such as Buy Bonus, Buy Pass, Fortune Spins, Feature Buy, Turbo and Speed Spins, some other configurable features and additional bets may not be available.
