Wins starting from left

Game Instructions

Splish & Splash™ is a slot game with 4 reels and 12 paylines.

HOW TO PLAY

- Press BET button to select the desired bet for the round.
- Press PLAY button to start the round.

Winnings

Paylines, win combinations and win sums are displayed in the payable. The win combination must be on a payline and placed on adjacent reels starting from the leftmost reel. Only the win for the most valuable symbol combination is paid out per payline. If several paylines have winning symbol combinations the wins are added together.

Press COLLECT to transfer the win to your balance or press GAMBLE to try to increase the win in the gamble feature.

The maximum win multiplier per game round (base game + any free spins and bonus games) is 1,200 times the total bet. If the win for a game round reaches this limit, the game round ends immediately, and any remaining free spins or bonus games will not be played. The player is awarded a win according to the maximum win multiplier.

Wild

There is a Wild symbol in the game that replaces all other base symbols. A Wild is always used to form the best possible winning combination.

Mystery Round

The Mystery Round is activated randomly within the game.

During this round, you gain access to one of four unique features, which remains available for that round only.

Random Wilds: Introduces 2-6 Wild symbols onto the reel. These symbols lock in place for the round.

Remove Symbols: Removes all instances of 2–5 different symbols from the reels. The Wild symbol, FREE Symbol, and the game's most valuable symbol (puffer fish) are not affected.

Reel Wild: Fills an entire reel with Wilds.

Big Reel: Transforms a reel into a larger one, spanning across 2, 3, or 4 reels.

Free spins

Free Spins are initiated when at least three FREE Symbols appear on the reels, regardless of whether they are on a payline. Every Free Spin game begins with a minimum of 3 Free Spin rounds. From the Bonus Select, you can win 1, 2, or 3 additional rounds. The number of Free Spin rounds and associated features are determined by unveiling lottery boxes before the Free Spin rounds start. The total number of unveiled boxes (3–16) correlates with the number of FREE Symbols won.

FREE SPINS BONUS SELECT

From the Bonus Select, you can reveal the following features:

+1, +2, +3 Extra Free Spin Rounds - These won rounds are added to the initial three Free Spin rounds.

Moving Wild - This Wild symbol relocates to a new position on the reel between rounds.

Additionally, you can encounter the Mystery features that are also present in the base game:

Random Wilds: Introduces 2–6 Wild symbols onto the reel, which lock in place for the round.

Remove Symbols: Removes all instances of 2–5 different symbols from the reels. The Wild symbol, FREE Symbol, and the puffer fish (the most valuable symbol in the game) are not affected.

Reel Wild: Fills an entire reel with Wilds.

Big Reel: Expands a reel to span 2, 3, or 4 reels.

FREE SPIN ROUNDS

Free Spin rounds do not deduct from the player's balance. The stake in the Free Spins mirrors that of the round in which the Free Spins were won.

Any potential Mystery features won from the selection are randomly activated or deactivated on each Free Spin round.

If multiple Mystery features are won, they can be activated simultaneously during the same game round.

During Free Spins, it is possible to win more Free Spins with FREE Symbols as follows:

2 x FREE Symbols: trigger an additional Free Spin round,

3 x FREE Symbols: trigger three additional Free Spin rounds,

4 x FREE Symbols: trigger four additional Free Spin rounds,

...and so on, up to a maximum of +8 Extra Free Spin Rounds.

The minimum potential win from Free Spins is zero.

Gamble

Press GAMBLE to try to increase the winnings in the gamble feature

In the gamble feature, the player must select one of three options (2x, 15x, 2x).

2X

15X

2X

If the choice is correct, you win the gambled sum multiplied by the number on the selected symbol. You can then continue the gamble or collect your winnings. If either of the 2x options was selected and the result of the gamble is 15x, the gambled bet is paid back. In this case, you can continue the gamble or collect your winnings.

If the choice is incorrect, you lose the gambled sum and gambling ends.

The maximum win from the Gamble feature is limited to the game's maximum win multiplier.

General instructions

Theoretical return to player: 94.99%

Theoretical return to player of gamble feature: 100.0%

Volatility: 3/5

Minimum bet: CA\$0.10

Maximum bet: CA\$50.00

Gamerounds that have not ended within 24 hours will be completed automatically. Accumulated wins will be payed to the player.
